Hiring Manager, Data Management — International Consumer Bank

JPMorgan Chase & Co. | Bengaluru, India

Re: Data Management Sr Associate — Job ID 210748551

Dear Hiring Manager,

I am writing to apply for the Data Management Sr Associate role within JPMorgan Chase's International Consumer Bank. As a final-year B.Tech Computer Science student at Manipal University Jaipur with hands-on experience in data pipelines, SQL, Python-based analytics, and AI-driven solutions, I am eager to contribute to Chase UK's mission of building a next-generation digital bank from the ground up.

My experience as a Full Stack & AI Developer at AgriCart Farmtech involved designing and maintaining end-to-end data pipelines, structuring large volumes of unstructured domain data, and delivering clean, analysis-ready datasets — directly reflecting your requirements around data accuracy, integrity, and pipeline development. At Deloitte's Capstone Program, I worked with structured transactional data to build a blockchain-powered audit trail system, giving me practical exposure to data governance, compliance, and traceability in a regulated context.

Across my academic projects, I have applied SQL and Python (Pandas, PySpark) for querying, transforming, and analysing large datasets, and have worked with formats including JSON and structured tabular data. My Power BI and Tableau experience equips me to translate complex data findings into clear visualisations and stakeholder-ready summaries — a core responsibility of this role. I also bring a strong foundation in testing and validation, having built and evaluated ML models with rigorous performance metrics.

I am particularly drawn to the collaborative, product-aligned nature of this team and the opportunity to work across domains such as payments, lending, and financial crime prevention. The prospect of building robust data reporting capabilities that directly shape customer experience at a globally trusted institution is a challenge I am genuinely excited to take on. I would welcome the opportunity to discuss how my skills can contribute to your team's goals. Thank you for your time and consideration.

Yours sincerely,

Harshwardhan Pandey
