Talent Acquisition Team

Siemens | India

Re: Application for Data Analyst Role — Siemens

Dear Hiring Team,

I am writing to apply for the Data Analyst role at Siemens. As a final-year B.Tech Computer Science student at Manipal University Jaipur with practical experience in data analytics, machine learning, and AI-driven solutions, I am excited by the opportunity to contribute to Siemens' mission of driving digital transformation and intelligent infrastructure through data.

My experience as a Full Stack & AI Developer at AgriCart Farmtech involved designing end-to-end data pipelines, cleaning and structuring large volumes of domain-specific data, and building analytical models deployed in production. At IIT Roorkee's SPARK Internship, I conducted environmental data analysis and produced research-backed insights for stakeholders — strengthening my ability to translate complex datasets into clear, actionable findings. At Deloitte's Capstone Program, I worked on data traceability and supply chain analytics, giving me exposure to enterprise-level data governance and process integrity.

I am proficient in Python (Pandas, Scikit-learn), SQL, Power BI, and Tableau — the core toolkit for data extraction, transformation, and visualisation. My project work spans predictive modelling for power outage forecasting, population density estimation using satellite imagery, and NLP-based sentiment analysis using BERT. These projects reflect my ability to apply statistical and ML techniques to real-world, data-rich problems — the kind Siemens operates with daily across its industrial, energy, and infrastructure divisions.

Siemens' commitment to innovation, sustainability, and data-driven engineering deeply resonates with me. I am detail-oriented, analytically rigorous, and thrive in collaborative, cross-functional environments. I would welcome the opportunity to bring my skills to your team and grow within one of the world's most respected technology organisations. Thank you for your consideration.

Yours sincerely,

Harshwardhan Pandey
